**INFORMATION DISCLOSURE STATEMENT UNDER 37 CFR 1.97**

COMMISSIONER FOR PATENTS  
ALEXANDRIA, VIRGINIA 22313

SIR:

Applicant(s) wish to disclose the following information.

**REFERENCES**

- ☒ The applicant(s) wish to make of record the references listed on the attached form PTO-1449. Copies of the listed references are attached, where required, as are either statements of relevancy or any readily available English translations of pertinent portions of any non-English language references.
- ☐ A check or credit card payment form is attached in the amount required under 37 CFR §1.17(p).

**RELATED CASES**

- ☐ Attached is a list of applicant's pending application(s) or issued patent(s) which may be related to the present application. A copy of the patent(s), together with a copy of the claims and drawings of the pending application(s) is attached along with PTO 1449.
- ☐ A check or credit card payment form is attached in the amount required under 37 CFR §1.17(p).

**CERTIFICATION**

- ☐ Each item of information contained in this information disclosure statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of this statement.
- ☐ No item of information contained in this information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application or, to the knowledge of the undersigned, having made reasonable inquiry, was known to any individual designated in 37 CFR §1.56(c) more than three months prior to the filing of this statement.

**DEPOSIT ACCOUNT**

- ☒ Please charge any additional fees for the papers being filed herewith and for which no check or credit card payment is enclosed herewith, or credit any overpayment to deposit account number 15-0030. A duplicate copy of this sheet is enclosed.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,  
MAIER & NEUSTADT, P.C.

FOR: FLUID PRESSURE CONTROL CIRCUIT

**STATEMENT OF RELEVANCY**

**Reference AO (JP 5-196127) on Form PTO-1449:**

In a fluid pressure control circuit, discharge of excess oil at the time of a relief is limited and an unstable pressure regulating action prevented by the effect of flow force by providing a relief valve between the discharge port of a pressure regulating valve and a fluid joint. In such a fluid pressure control circuit, the fluid pressure to be applied to the valve element via the feedback passage does not always reflect the fluid pressure in the fluid pressure device due to resistance generated during circulation of the fluid in the connecting passage or the like, when the fluid is being supplied/discharged or the fluid pressure is being changed. Therefore the flow rate of the fluid which circulates through the control valve is decreased, which makes it difficult to obtain sufficient responsiveness.

**Reference AP (JP 5-196125) on Form PTO-1449:**

A precise pressure reducing function is provided by providing a port fed with the output pressure between an input port fed with main pressure and a feedback port.

**Reference AO (JP 5-196127) on Form PTO-1449:**

An occurrence of an abrupt speed change is prevented by sealing the operating oil in an input pulley piston chamber when a failure occurs on an electronic control device, etc.
